OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Chum salmon	Sept 29, 1994			X	X

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Two adult fall chum salmon were observed (one was caught and released in gillnet) in the West Fork Tolovana River approximately one mile above the confluence with the Tolovana River. Don Beach and Roy Perry (SF) also observed these fish.

Name of Observer (please print) Glenn Townsend  
Date: 9/29/94 Signature: Glenn Townsend  
Address: 1300 College Rd Fairbanks, Ak 99701  
ALASKA DEPT. OF FISH & GAME  
NOV 02 1994  
REGION II HABITAT AND RESTORATION DIVISION

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
